This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. NOTICE.

In publishing this Telegraphic Code, we have made it a special object to simplify it as much as possible, and while condensing, to have everything as distinct and well defined as is practicable in such a work.

The word "Cable" specifically, as such, has not been used in this book, since it will probably be used quite as much in the European and American continents as between countries divided by oceans.

THE ALPHABETICAL ARRANGEMENT.

The headings and phrases being arranged alphabetically, the required sentences may be determined at a glance. Not only does this distinct and comprehensive arrangement apply to the heading, but to the entire plan as well; the alphabetical order even extending to the third and sometimes to the fourth word; unquestionably of great value for quick cabling purposes.

Phrases difficult of distinct classification will be found under the heading of Miscellaneous.

In order to facilitate ready reference, the Table headings have been arranged in the index whenever possible under more than one head; thus "Shipping by express" will be found indexed under "Shipping" as well as "Express," and so on.

THE PROVISION FOR CURRENCY.

In all instances where Currency is provided for, it is understood (unless otherwise indicated), that same pertains to the countries wherein the order or business is executed—thus Pounds (£) for the United Kingdom, Dollars ($) for the United States, Marks (M) for Germany, Francs (Frcs) for France, etc., and those terms may be omitted in messages, but this explanation naturally does not refer to the table of Currency on pages 692 to 696.

DIRECTIONS.

It is well to notice that when a portion or ending of a sentence is followed with a dash, enclosed in brackets (—), the bracketed portion is without effect unless followed by an additional word or phrase in keeping with the tenor of the telegram; for example of this, see "Aalmolche," page 1.

It is understood that when a sentence or a word ends with a dash, enclosed in brackets, (—); as also, with a word enclosed in brackets; that the word or sentence with the dash is *alone* to be used, provided the required word to replace the dash be added, in which case the word without the dash becomes void; but if the suitable word to replace the dash be not used, then the word without the dash is intended—as instance of this, see "Aalstachel," page 1.

When a sentence carries two words, or terms, each in parenthesis, only one is to be used, and the subject matter following will readily indicate which one takes effect; see "Aanspeten," page 5.

Whenever practicable the pronouns "I" and "We" have been omitted, since they can be safely dispensed with, and their presence in a Code frequently interferes with proper alphabetical arrangement. For instance, from the phrase "Will fill your order next week," it may be understood that the *party* telegraphing "will fill your order," hence no occasion to precede the phrase with "I" or "We." The present arrangement, moreover, gives opportunity to precede the sentences with name of other party, or matter, if desired. When necessary, however, to use the pronoun, we have given the plural "We" the preference, and no one need have any fear of the message being misinterpreted.

THE OFFICIAL VOCABULARY.

One especial recommendation of the present work is the fact that the Ciphers (of 5 to 10 letters) are taken solely from the "Berne Official Vocabulary," which has been declared as obligatory for preconcerted telegraphic Code-words to and from Europe on and after the first of January, 1898. While the introduction of a compulsory selection of Code Ciphers as projected by the International Telegraphic Bureau, is in some respects a public convenience, the adoption of the "Official Vocabulary" would not be altogether safe apart from expert supervision of the Ciphers it offers to cablers. Its adoption means new cable Codes, and the cabling public must buy them, but *extreme* caution should be exercised in using only such works as offer the greatest safety. We claim that our Code is perfectly safe, a result reached only after careful supervision by some of the best talent known to international cable intercourse.

The *selection* of Ciphers alone has entailed a labor of many months, including the assistance of skilled experts thoroughly versed in the probability of ordinary and even extraordinary mutilation in passing of messages from one circuit to another, to say nothing of the almost inevitable errors arising from frequent imperfect working of the ocean cables; thus it presents the all-important feature of containing *only* such of the Ciphers as are most likely to obviate chances of mutilation, or confliction, to effect which the compilers of this work have exercised in the most cautious manner the elimination of such words as offered a positive objection by their close similarity, not differing either in character or meaning to an extent sufficient to preclude the possibility of misconstruction; for instance, we found such words as "colluding" and "colliding"; "confiront" and "confront"; "citerons" and "citrons"; "cinnamon" and "cinnadon"; "calves" and "calvos," etc.; also "cheap," "charge," "cargo," "collect," "bimonthly," "eighteenth," "eleventh," etc.; also "antomotriz" should have been "automotriz," "Dansebunt" should be "Densebunt," "Cncciolino" should be Cucciolino," and "convictive" was before "conviction" (out of alphabetical order, not to speak of its close similarity), and *many* more instances we could give of the *great* danger there would have been had the words been used as given in the new "Official Vocabulary" as published. Words with *ij* have not been employed, as were the dots (·) to be omitted, the letter y would be the result.

Although we have used a large number of Ciphers in this Code, only those from "A" to "F" are employed, so a large scope is offered to cablers in the balance of the words pertaining to the "Official Vocabulary" for the purposes of arrangement in any manner that may be dictated as suitable for additions for private use and tabulating combinations, for which latter purpose each Cipher is numbered.

THE WORD NUMBER.

The word number given to each and every Cipher has no meaning or significance in connection with the actual Code Cipher—the word numbers simply supplying a system which facilitates arrangements for combinations now so generally employed by the cabling public.

N. B.—*EXPLANATION.*—The words stand for the figures at the top with the fractions on the extreme right *or* left added. *EXAMPLE.*—Decubito is 1-100: Dedalo is 2 2-100.

☞ An application can be made with these tables to represent any sum (within these numbers) that may be desired, by adding after the code-words the name of the highest denomination of the money mentioned. For instance, $1.43 would be represented by—Dedalian, dollars. Fcs. 2.30 by—Dedicavate, francs. Marks 3.20 by—Dedocebunt Marks. The Dollars, Marks and Francs, as used above, could be omitted if there is but one currency in use between the parties telegraphing.

REFUSAL.

☞ It is understood that the limit will expire according to the standard time of city sending telegram.

	As per your authority we have given refusal until.	At what price can you give refusal until?	Can in all probability close it at —— if you give us refusal until.	Cannot give refusal but would probably accept if in hand by ——.
